I HEARBY CERTIFY THAT ALL UTILITIES HAVE BEEN PROPERLY DISCONNECTED AT THE ABOVE LISTED PROPERTY TO BE DEMOLISHED AND ALL ABOVE STATEMENTS ARE CORRECT.

SIGNATURE OF APPLICANT DATE

SIGNATURE OF BUILDING OFFICIAL DATE

FINAL INSPECTION APPROVAL DATE

IMPORTANT INFORMATION

Please be aware of the following State Law:

Structures (such as houses, barns, and sheds) may not be burned for the purpose of demolition. Air quality regulations allow structures to be intentionally burned for the purpose of fire department training ONLY. However, there are specific guidelines developed by the National Fire Protection Association (NFPA) that fire departments must follow when conducting a training exercise. A guidance document for fire departments conducting fire suppression training can be found on the DEQ's Open Burning web site www.michigan.gov/deq (click on "Air" then "Open Burning Information").

Construction and Demolition Waste Construction and demolition (C & D) waste is waste building material, packaging, and rubble that results from construction, remodeling, repair, and demolition operations on houses, commercial or industrial buildings, and other structures. C & D waste may be generated at many sources including households, commercial establishments, and industrial facilities. The open burning of any C & D waste is prohibited, even if the burning is to be conducted on the person's own property. A person may NOT take C & D waste to another location (such as a household) to be burned. C & D waste should be reused, recycled, or disposed of in a landfill that accepts C & D waste (see the "Open Burning Alternatives" section of this guide)

It is also prohibited to bury such materials on a property. Materials must be disposed of in a licensed landfill qualified to handle such waste.
